

Easy-to-use software for your membership management

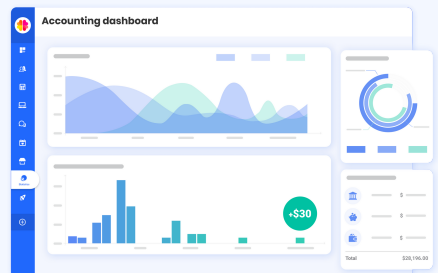

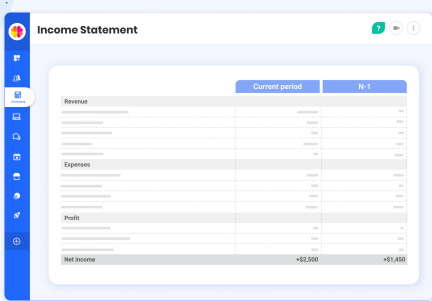

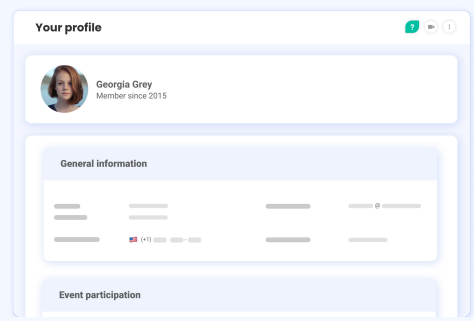

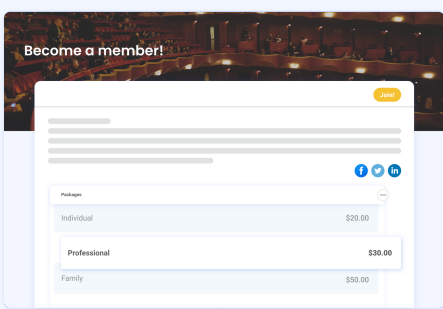

Springly is a powerful membership management software that helps organizations streamline their daily management by putting all the tools they need in one place. Create custom membership campaigns, collect online payments, send emails, add information to your CRM, and record all operations in your full Accounting suite.

Our Tools are built to work together and automate data entries and information for you. No more entry errors - we've taken synchronization to the next level. Organizations spend less time on their admin, and more time in the field.

Automation you can see

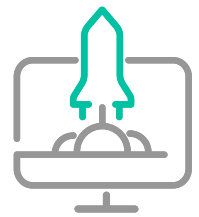

Collaborative

No limit to the number of Admins. Restrict access based on feature or role.

Accessible

Access your software 24/7 using your phone, tablet or computer.

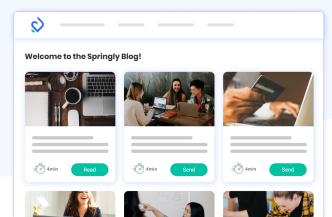

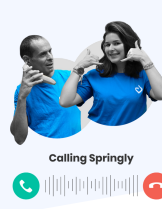

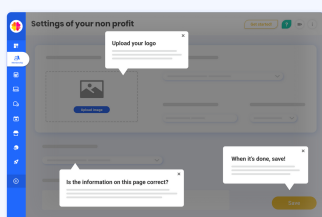

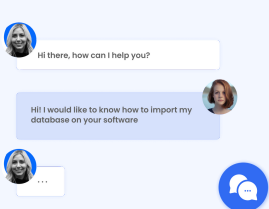

Scalable

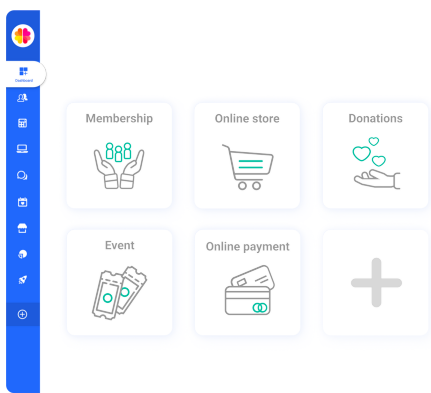

Over 50+ included features available for you to use today, or grow into over time.

Our customers experience matters

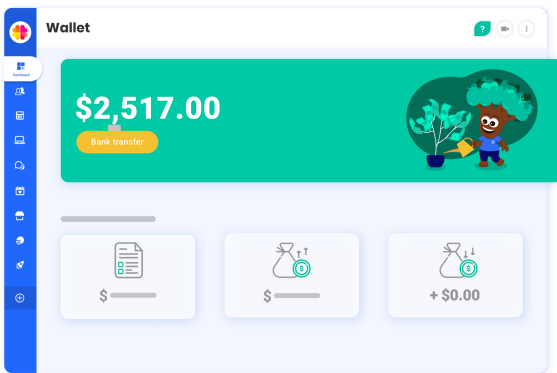

Whether it's by chat, call, or help center article - we've made support accessible to the way you prefer it, when you need it.

Grow your membership and diversify your revenue streams

Promote your latest membership and donation campaigns online

Open an online store or manage your event registration online
